

# Smart Goals

## The Smart Goals

The **Student Task Management System (STMS) app** at department is designed to help students effectively organize and manage their academic tasks and responsibilities. The app provides a centralized platform where students can track assignments, deadlines, and other educational activities. The app provides a centralized platform where students can track assignments, deadlines, exam schedules, and other educational activities. It streamlines communication between students, teachers.

This main project aims is to **improve students' academic experience** by providing a reliable, easy-to-use tool that supports educational success and helps manage **workload effectively**.

**Goal One:** “Goal One wants to Simplify the task to students.”

To Clarify and streamline the management of all student academic tasks, ensuring that students have an organized and accessible way to track and **complete their assignments efficiently**.

**Goal Two:** “Goal two wants to replace traditional methods at university level.”

This digital approach **replaces traditional manual methods** like notebooks or disconnected reminder apps, **promoting better time management** and academic performance.
